Yixian Chen, Ph.D.

Department of Geography and the Environment, The University of Alabama, Tuscaloosa, AL 35401, USA

Email: ychen223@ua.edu | Tel: +1 659 210 9651 | Website | Google Scholar | LinkedIn | ResearchGate

Education

2014.09 – 2021.01	**Ph.D.** in *Soil Science* University of Chinese Academy of Sciences, Yangling & Beijing, China Advisor: Juying Jiao (ResearchGate) Dissertation: *Morphological Spatial Variation and Development Mechanisms of Gullies on the Chinese Loess Plateau*
2019.10 – 2020.10	**Visiting Ph.D. Student** University of Liège, Liège, Belgium Advisor: Matthias Vanmaercke (Google Scholar) Research: *Sub-Continental Gully Density Prediction Based on a Machine Learning Approach*
2010.09 – 2014.06	**B.S.** in *Soil and Water Conservation and Desertification Control* Guizhou University, Guiyang, China

Professional Experience

2026.04 – Present	**Research Scientist** The University of Alabama, Tuscaloosa, USA Advisor: *Sagy Cohen* (Lab website) Research: *Optimal Synthetic Rating Curve Calibration for the U.S. Operational Flood Inundation Mapping using Large-Scale Benchmark Flood Maps*
2024.05 – 2026.03	**Postdoctoral Fellow** The University of Alabama, Tuscaloosa, USA Advisor: *Sagy Cohen* Research: *Improving Spatial and Temporal River Slope Data for the U.S. Operational Flood Inundation Mapping*
2022.07 – 2023.06	**Postdoctoral Researcher** Katholieke Universiteit Leuven (KU Leuven), Leuven, Belgium Advisor: *Matthias Vanmaercke* Research: *Data-Driven Prediction of Gully Densities at the Global Scale*
2021.03 – 2024.04	**Postdoctoral Researcher** Northwest University, Xi'an, China Advisor: *Ninglian Wang* (ResearchGate) Research: *Morphological Characteristics and Volume Estimating Models of Gullies on the Chinese Loess Plateau*

Research Interests

Flood Inundation Mapping, Surface Water Topography, 3S (GIS, GPS, RS)-Based Measurements of Geomorphic Processes, Gully Erosion, Rainstorm Soil Erosion, Soil and Water Conservation, Geospatial Analysis, Machine Learning

Research Grants

- **Selecting the Optimal Synthetic Rating Curve Calibration Approach for Operational Flood Inundation Mapping using Large-Scale Benchmark Flood Maps**
  NOAA CIROH FY26 Research Project, 2026.07-2027.03, $300K USD. Role: PI
- **The Affecting Mechanisms of Valley Bank Gully on Erosion of Downslope Bank Slope in the Hilly-Gully Region of the Loess Plateau, China**
  National Natural Science Foundation of China (NSFC) Young Scientist Project, 2025-2027, ~$41K USD. Role: PI
- **Morphological Characteristics and Volume Estimating Models of Gullies on the Chinese Loess Plateau**
  China Postdoctoral General Project, 2021-2023, ~$11K USD. Role: PI
- **Morphological Characteristics and Volume Estimating Models of Gullies on the SW Chinese Loess Plateau**
  Natural Science Basic Research Program of Shaanxi Province, China, 2022-2023, ~$6.9K USD. Role: PI
- **Quantifying Gully Erosion and its Impacts on Catchment Sediment Yields at the Global Scale**
  Submitted Postdoctoral Fellowship Proposal to the National Fund for Scientific Research of Belgium, 2021, Not Selected. Role: PI
- **The Response Mechanism of Catchment Sediment Connectivity to Rainfall and Human Activities in the Loess Hilly and Gully Region**
  NSFC General Project, 2018-2020, ~$108K USD. Role: Major Participant
- **Blocking and Controlling Mechanisms of Slope Lands Abandonment and Check Dams on Erosion and Sediment Yields of Slope-Gully System in the Chinese Loess Plateau**
  NSFC General Project, 2014-2017, ~$104K USD. Role: Major Participant

Peer-Reviewed Publications (full list available on Google Scholar)

Author of **22** articles in SCI journals (5 as first author; 1 as second author, with my supervisor as first and corresponding author), and 10 articles in Chinese journals (**1** as first author and 1 as second author). As of August 2026: 771 citations, h-index 17.

In review & preparation:

1. **Chen, Y.**, Cohen, S., Dhital, S., Devi, D., & Baruah, A. (2025). Spatial and Temporal Variability in Global River Slopes from the Surface Water and Ocean Topography (SWOT) Satellite. *Geophysical Research Letters*. Under revision.
2. Dhital, S., Cohen, S., Nikrou, P., Baruah, A., **Chen, Y.**, Munasinghe, D., & Devi, D. (2025). Enhancement of low-fidelity flood inundation mapping through surrogate modeling. *Water Resources Research*. Under revision.
3. Baruah, A., Munasinghe, D., Cohen, S., Abdelkader, M., Devi, D., **Chen, Y.**, & Vergara, H. (2026). Brief Communication: Rise of the Guadalupe River — A Multifaceted Post-Event Analysis of the July 4, 2025, Flood in Central Texas. Natural Hazards and Earth System Sciences, 1-13. Under revision.

Conference Presentations

1. **Chen, Y**., Cohen, S., Dhital, S., Baruah, A., Devi, D., & Munasinghe, D. (2026, August). RiverJoin: A Framework for Spatially Joining River Flowlines across Heterogeneous Hydrographic Datasets to Enable Bidirectional Attribute Transfer. In: Global Flood Partnership Annual Meeting. (Oral presentation)
2. **Chen, Y**., Dhital, S., Cohen, S., Baruah, A., Devi, D., & Zarrabi, R. (2026, May). Temporal Variability in Global River Slopes from the Surface Water and Ocean Topography (SWOT) Satellite. In: CIROH Developers Conference. (Poster)
3. **Chen, Y**., Baruah, A., Devi, D., Dhital, S., Munasinghe, D., Tian, D., Zarrabi, R., & Cohen, S. (2026, March). Improving the Spatial and Temporal Representation of River Slope to Enhance Flood Inundation Mapping. In: CIROH 5 Year Science Review. (Invited poster)
4. **Chen, Y.**, Dhital, S., Cohen, S., Baruah, A., & Devi, D. (2025). Global-Scale Analysis of River Slope Monthly Variation Based on the SWOT River Vector Data Product. In: *American Geophysical Union (AGU) Fall Meeting*.
5. **Chen, Y.**, Baruah, A., Devi, D., & Cohen, S. (2025). Improved River Slope Datasets for the United States Operational Flood Inundation Mapping Hydrofabric and Next Generation Water Resources Modeling Hydrofabric. In: *CIROH Developers Conference.*
6. **Chen, Y.**, Baruah, A., Devi, D., & Cohen, S. (2024). Updating the US Hydrofabric Slope Parameter

Using a Remote Sensing Dataset: Impact on Flood Inundation Mapping. *AGU2024 Annual Meeting*. [*link*]

7. **Chen, Y.**, De Geeter, S., Poesen, J. W., Matthews, F., Campforts, B., Borrelli, P., ... & Vanmaercke, M. (2024, December). Data-Driven Prediction of Gully Densities at the Global Scale. *AGU2024 Annual Meeting* (Vol. 2024, No. 63, pp. GC31R-0063).
8. **Chen, Y.**, De Geeter, S., Poesen, J., Campforts, B., Borrelli, P., Panagos, P., & Vanmaercke, M. (2023). Data-driven prediction of gully densities at the global scale. *Young Soil Scientists Day of Soil Science Society of Belgium, Brussels, Belgium.*
9. **Chen, Y.**, De Geeter, S., Poesen, J., Campforts, B., Borrelli, P., Panagos, P., & Vanmaercke, M. (2023). Data-driven prediction of gully densities at the global scale. *The 9th International Symposium on Gully Erosion, Chengdu, China.*
10. **Chen, Y.**, Jiao, J., Yan, X., & Li, J. (2023). Characteristics of morphology and density of gullies along a rainfall gradient on the Chinese Loess Plateau. *Annual Meeting of Soil Erosion and Soil and Water Conservation Professional Committee of China Soil Society, Xichang, China.*
11. **Chen, Y.**, Vanmaercke, M., Jiao, J., Bai, L., Tang, B., Wang, N., *et al. (2021). Quantifying the importance* of different erosion processes and collapsed soil and water conservation measures on catchment sediment due to an extreme rainstorm: a field-based case study in the Chinese Loess Plateau. *International Forum on Land Degradation, Soil Conservation and Sustainable Development, Dalian, China. [link]*
12. **Chen, Y.**, Jiao, J., Vanmaercke, M., Yan, X., & Li, J. (2020). Spatial variation of gully density and morphology and their controlling factors at a regional scale: a case study for the Chinese Loess Plateau. In *EGU General Assembly Conference Abstracts, p. 147. [link]*
13. **Chen, Y.**, Jiao, J., Bai, L., Tang, B., Wang, N., Zhang, Y., & Wang, H. (2018). Soil erosion hotspots in small watershed under extreme rainstorm on the Loess Plateau, China. *The Second International Young Scientists Forum on Soil and Water Conservation and ICCE symposium 2018 "Climate Change Impacts on Sediment Dynamics: Measurement, Modelling and Management", Moscow, Russia.*
14. Vanmaercke, M., **Chen, Y.**, De Geeter, S., Yihunie, Y., Dujardin, E., Mawe, G. I., Landu, E. L., & Poesen, J. (2025). Gully erosion might become a larger problem than hitherto anticipated: insights from fieldwork and recent modelling advancements. In *EGU General Assembly Conference Abstracts, EGU25-9577.* (Invited) *[link]*
15. Liu, H., Wang, C., **Chen, Y.**, Ma, L., Zhang, C., Long, Y., & Yang, Q. (2025). Random forest-based prediction of gully density on farmland in the Songnen typical black soil region of the Northeast, China. In *EGU General Assembly Conference Abstracts, EGU25-9463. [link]*
16. Vanmaercke, M., **Chen, Y.**, De Geeter, S., Poesen, J., Campforts, B., Borrelli, P., *et al*. (2022). Data-driven prediction of gully densities and erosion risk at the global scale. In *EGU General Assembly Conference Abstracts, EGU22-2921. [link]*
17. Vanmaercke, M., **Chen, Y.**, De Geeter, S., Poesen, J., & Campforts, B. (2020). A first data-driven gully head density map of the world. In *EGU General Assembly Conference Abstracts, p. 9285. [link]*

Book Chapter

Jiao, J., Wang, N., Liang, Y., **Chen, Y.**, Tang, B., Bai, L., *et al*. Effectiveness of Soil and Water Conservation Measures. In: Comprehensive Investigation Report on Soil and Water Conservation Effectiveness Against the Erosion and Flooding by the "7·26" Exceptional Rainstorm in the Chinese Loess Plateau. Liu, B., Yao, W., Liu, G., An, S., Han, J., Cao, W., *et al*. First Edition. *Science Press*, Beijing, China. 2020. Chapter 10: 188-215. *[link]*

Media Coverage

1. **Cooperative Institute for Research to Operations in Hydrology (CIROH) News:** "New Satellite-Derived River Slope Database Helps Improve U.S. Flood Forecasts" (https://awi.ua.edu/2025/09/26/new-satellite-derived-river-slope-database-helps-improves-u-s-flood-forecasts/), featuring my research on improving river slope representation to increase the accuracy of U.S. operational flood inundation mapping.

   (CIROH, a partnership between NOAA and The University of Alabama, is a national consortium committed to advancing water prediction – the forecasting of streamflow entering water systems, extreme events such as floods and droughts, and water quality – and building community resilience to water-related challenges.)

2. **BBC News Brasil:** "The vast ravines swallowing whole neighborhoods around the world" (https://www.bbc.co.uk/news/resources/idt-61d57e25-d458-4785-8a37-3ef119a504c7), highlighting results from our global gully erosion research.

3. **EU Soil Observatory Newsletter by European Commission's Joint Research Centre**: "Global patterns of gully occurrence" (https://ec.europa.eu/newsroom/jrc/newsletter-archives/74237), featuring my global gully occurrence modeling work as a research highlight; the resulting global gully maps are archived in the European Soil Data Centre (ESDAC, https://esdac.jrc.ec.europa.eu/content/global-patterns-gully-occurrence).

4. **ScienceNet:** "The hazards and considerations of soil erosion in small watersheds caused by the 'July 26' heavy rainstorm in Zizhou, northern Shaanxi, China" (https://news.sciencenet.cn/sbhtmlnews/2017/9/327683.shtm), featuring our research findings on severe soil erosion induced by heavy rainstorms and efforts to control it.

   (ScienceNet is a comprehensive science website supervised by the Chinese Academy of Sciences, the Chinese Academy of Engineering and the National Natural Science Foundation of China, and hosted by Science Times. It mainly provides netizens with fast and authoritative scientific news reports, rich and practical scientific information services, and an online platform for communication and interaction. Its goal is to build the most influential global Chinese scientific community.)

Teaching and (co-)supervising

Fall 2026 – present	GIS Programming — Teaching Assistant, The University of Alabama
2026	Co-led graduate students assessing the impact of dynamic river slope on flood inundation mapping in the CUAHSI Water Prediction Innovators Summer Institute at the University of Alabama
2025 – present	Supervising 5 undergraduate students at Northwest University (China) to identify the effect of hillslope gullies on hydrological connectivity and downstream soil erosion
2025	GIS Programming — Guest lecture, The University of Alabama
2023 – 2026	Co-supervised 1 graduate student at Northwest University (China) on her Master Thesis on gully occurrence and morphology modeling in the Northeastern Black Soil region of China
2019 – 2024	Co-supervised 1 graduate student at the Institute of Soil and Water Conservation, Chinese Academy of Sciences on his PhD Dissertation on gully erosion modeling using machine learning and gully systematic classification in the Tibetan Plateau
